COVID-19 HANDLING TASK UNIT  
CIRCULAR LETTER NUMBER 17 OF 2022 CONCERNING  
OVERSEAS TRAVEL HEALTH PROTOCOL DURING THE CORONA VIRUS DISEASE PANDEMIC 2019 (COVID-19)

**E. Definitions**

1. Foreign Travel Actors, hereinafter abbreviated as PPLN are Indonesian citizens/WNA who have traveled from abroad in the last 14 days.
2. Reverse-Transcriptase Polymerase Chain Reaction, hereinafter referred to as RT-PCR, is a type of diagnostic test that detects viral genetic material originating from certain samples, such as the nasopharyngeal/oropharyngeal swab test, using reverse-transcriptase enzymes and polymerase chain reactions.

3. Quarantine is an effort to temporarily separate healthy people or people who have been exposed to COVID-19 (either from a history of contact or a history of traveling to areas where community transmission has occurred) even though they have not shown any symptoms or are currently in the incubation period, which aims to ensure that there are no symptoms. and prevent possible transmission.
4. Independent health monitoring is an effort to observe physical health conditions by each PPLN which aims to ensure that COVID-19 symptoms do not appear and prevent possible transmission.
5. Isolation is an effort to temporarily separate someone who is sick and requires COVID-19 treatment or someone who is confirmed to have COVID-19 based on diagnostic results, from healthy people with the aim of reducing the risk of transmission.
6. Health insurance is proof of ownership of insurance to the insured to cover any costs for handling COVID-19 which includes costs for treatment, surgery, and medicines.
7. Vaccine certificate is a physical document or digital proof that a series of vaccinations has been received.
8. Community transmission is a condition of high transmission detected between residents in an area whose source of transmission can come from within and/or outside the area.
9. Centralized quarantine is quarantine activity for PPLN concentrated in one place of quarantine accommodation, either in government-owned locations or hotels.
10. PPLN under 18 years of age and requiring special protection are children who are in an emergency situation; children in conflict with the law; children from minority and isolated groups; economically and/or sexually exploited children; children who are victims of abuse of narcotics, alcohol, psychotropic substances, and other addictive substances; children who are victims of pornography; children with HIV/AIDS; child victims of abduction, sale, and/or trafficking; child victims of physical and/or psychological violence; child victims of sexual crimes; child victims of terrorist networks; children with disabilities; child victims of abuse and neglect; children with deviant social behavior; and children who are victims of stigmatization from labeling related to their parents' condition.
11. Dispensation is a decision of an authorized government official as a form of approval of the request of Community Citizens which is an exception to a prohibition or order in accordance with the provisions of the legislation.
12. S-Gene Target Failure, hereinafter referred to as SGTF, is a type of test using the molecular detection method or Nucleic Acid Amplification Test (NAAT) which is capable of detecting the failure of detection of the S gene when other genes are detected as a screening marker for variants that have a mutation rate spike (S) high like SARS-Cov-2 variant B.1.1.529.
13. A confirmed positive case of COVID-19 without symptoms is someone who is confirmed positive for COVID-19 and has no clinical symptoms.

14. A positive confirmed case of COVID-19 with mild symptoms is a person who is confirmed positive for COVID-19 with symptoms such as fever, cough, fatigue, anorexia, shortness of breath, myalgia, and other non-specific symptoms, without evidence of viral pneumonia or without hypoxia.
15. A positive confirmed case of COVID-19 with moderate symptoms is a person who is confirmed positive for COVID-19 with clinical signs of pneumonia such as fever, cough, shortness of breath, and rapid breathing without signs of severe pneumonia such as oxygen saturation below 93% in room air.
16. A positive confirmed case of COVID-19 with severe symptoms is a person who is confirmed positive for COVID-19 with clinical signs of pneumonia such as fever, cough, shortness of breath, and rapid breathing, accompanied by one of the symptoms, namely respiratory rate above 30 times per minute, distress heavy breathing, or oxygen saturation below 93% of room air.
17. Medical evacuation is an act of mobilization with medical emergency standards for people who are confirmed positive for COVID-19 based on RT-PCR examination from an area to a treatment referral hospital or isolation/care place.

#### **F. Protocol**

1. PPLN enters the territory of Indonesia through the entry points for foreign travel as follows:

    - i. Indonesian citizens of PPLN who have not received the vaccine will be vaccinated at the entry point for overseas travel after an RT-PCR examination on arrival with a negative result or at a quarantine place after a second RT-PCR examination with a negative result is carried out;
    - ii. PPLN foreigners who have not received the vaccine will be vaccinated at the entry point for overseas travel after an RT-PCR examination on arrival with a negative result or at a quarantine place after a second RT-PCR examination with a negative result is carried out, with the following conditions:
      - 1) aged 6 - 17 years;
      - 2) holders of diplomatic residence permits and official residence permits; and/or
      - 3) limited stay permit card (KITAS) and permanent residence permit card (KITAP).
    - iii. PPLN foreigners who are already in Indonesia and will travel, both domestically and internationally, are required to vaccinate through a program or mutual cooperation scheme in accordance with the provisions of the legislation;
    - iv. the card/certificate (physical or digital) has received the second dose of COVID-19 vaccine written in English, in addition to the language of the country of origin.
  - d. The obligation to show a COVID-19 vaccination card/certificate (physical or digital) as referred to in letter c is exempted from:
    - i. PPLN foreigners holding diplomatic visas and service visas related to official/state visits of foreign officials at ministerial level and above and foreigners who enter Indonesia under the Travel Corridor Arrangement scheme, in accordance with the principle of reciprocity while still implementing strict health protocols;
    - ii. PPLN foreigners who have not vaccinated and intend to travel domestically in order to continue their journey with international flights out of Indonesian territory, are allowed not to show their COVID-19 vaccination card/certificate as long as they do not leave the

airport area during transit waiting for an international flight to be followed, with the following requirements:

- 1) Has been permitted by the local Port Health Office (KKP) to travel domestically in order to continue the journey with international flights out of the territory of Indonesia; and
  - 2) Shows the schedule of flight tickets outside Indonesia for direct transit from the departure city to the international airport in the territory of Indonesia with the final destination to the destination country.
- iii. PPLN under 18 years old; and
- iv. PPLN with special health conditions or comorbid diseases that cause travelers to be unable to receive vaccines, with the condition that they must attach a doctor's certificate from the Government Hospital of the country of departure stating that the person concerned has not and/or cannot participate in the COVID-19 vaccination.
- e. shows a negative result through the RT-PCR test in the country/region of origin whose samples are taken within a maximum period of 2 x 24 hours before departure and are attached at the time of the health check;
- f. in the event that the PPLN will carry out centralized quarantine with self-financing, it must show proof of payment confirmation for the reservation of quarantine accommodation from the accommodation provider while staying in Indonesia;
- g. in the case of PPLN that has been confirmed positive for COVID-19 maximum 30 days before departure and has been declared inactive in transmitting COVID-19, except for the obligation to show a COVID-19 vaccination card/certificate and negative RT-PCR results before departure on condition that they must carry out RT-PCR re-examination upon arrival and attach a doctor's certificate or COVID-19 recovery certificate from the Government Hospital of the country of departure or the ministry that carries out government affairs in the health sector in the country of departure stating that the person concerned is no longer actively transmitting COVID-19;
- h. for PPLN foreigners, attach proof of ownership of health insurance which includes financing for handling COVID-19 and medical evacuation to a referral hospital with a minimum coverage value as determined by the organizer, manager, or local government;
- i. Upon arrival, PPLNs are required to undergo an examination of symptoms related to COVID-19 including checking body temperature and proceed with the following conditions:
- i. in the event that the PPLN is detected to have symptoms related to COVID-19 and/or has a body temperature above 37.5 degrees Celsius, it is obligatory to undergo a RT-PCR re-examination at the cost of being borne by the government for Indonesian citizens and the costs being borne independently for foreigners; or
  - ii. in the event that the PPLN is detected to have no symptoms related to COVID-19 and has a body temperature below 37.5 degrees Celsius, it can continue the journey with the following conditions:
    - 1) for PPLN who have not been able to get vaccinated or have received the first dose of vaccine at least 14 days before departure, are required to quarantine for 5 x 24 hours;

- 2) for PPLN who have received the second or third dose of vaccine at least 14 days before departure, are allowed to continue the journey;
  - 3) for PPLN under 18 years of age and/or in need of special protection, the quarantine arrangements follow the provisions imposed on their parents or caregivers/travel companions; or
  - 4) For PPLN with special health conditions or comorbid diseases that cause the traveler to have not and/or not be able to take part in the COVID-19 vaccination, they are allowed to continue the trip by being obliged to attach a doctor's certificate from the Government Hospital of the country of departure stating that the person concerned has not and/or or unable to follow the COVID-19 vaccination.
- j. after RT-PCR sampling on arrival as referred to in letter i.i., PPLN continues with:
- i. inspection of immigration documents and customs documents;
  - ii. baggage collection and baggage disinfection;
  - iii. pick-up and drop-off directly to the hotel, lodging accommodation, or place of residence;
  - iv. waiting for the results of the RT-PCR examination in hotel rooms, rooms at lodging accommodations, or places of residence; and
  - v. are not allowed to leave hotel rooms, rooms at lodging accommodations, or residences and are not allowed to interact with other people before the results of the RT-PCR examination show negative results.
- k. in the event that the results of the RT-PCR re-examination upon arrival as referred to in letter i.i. shows a negative result, the following provisions shall apply:
- i. for PPLN who have not been able to get vaccinated or have received the first dose of vaccine at least 14 days before departure, are required to quarantine for 5 x 24 hours;
  - ii. for PPLN who have received the second or third dose of vaccine at least 14 days before departure, are allowed to continue the journey;
  - iii for PPLNs under 18 years of age and/or in need of special protection, the quarantine arrangements follow the provisions imposed on their parents or caregivers/travel companions; or
  - iv. For PPLNs with special health conditions or comorbid diseases that cause travellers to have not and/or are unable to take part in the COVID-19 vaccination, they are allowed to continue the journey by being obliged to attach a doctor's certificate from the Government Hospital of the country of departure stating that the person concerned has not and/or not can follow the COVID-19 vaccination.
- l. in the event that the PPLN has obtained a negative result on the RT-PCR re-examination upon arrival and is allowed to continue the journey as referred to in letter k.ii. and letter k.iv., it is recommended to carry out independent health monitoring of COVID-19 symptoms for 14 days by implementing health protocols;
- m. in the event that the results of the RT-PCR re-examination upon arrival as referred to in letter i.i. shows a positive result, then follow-up is carried out with the following conditions:

- i. if there are no symptoms or experiencing mild symptoms, isolation/treatment is carried out in isolation hotels or centralized isolation facilities set by the government or self-isolation at residence with isolation/treatment times in accordance with the recommendations of the ministry in charge of government affairs in the health sector; or
  - ii. if accompanied by moderate or severe symptoms, and/or with uncontrolled comorbidities, isolation or treatment is carried out at a COVID-19 referral hospital with isolation/treatment time according to the recommendation of the doctor and the recommendation of the ministry in charge of government affairs in the health sector; and
  - iii. All costs for handling COVID-19 and medical evacuation for foreigners are borne independently, while for Indonesian citizens it is borne by the government.
